

Ukraine Regional Energy Integration Intern

Project Title	Ukraine Regional Energy Integration Intern
Project Summary	If you've ever wanted to know more about pipeline politics, hub pricing of energy commodities, synchronization of electrical transmission infrastructure, and/or the cost-benefits of shifting away from fossil fuels to clean energy, but have no previous experience in energy – we want you!
Country	Ukraine
Agency	Department of State
DoS Office	N/A
Post	KYIV
Section	ECON
Number of Interns	1

Project Description

U.S. Embassy Kyiv's Economic Section is looking for an intern interested in researching about European energy policy as it applies to Ukraine as well as Ukraine's integration into European Energy Markets. As Kyiv's Regional Energy Integration Intern, you'll research energy-related topics, write up short analytical papers arguing in favor or against a specific policy, and inform policy makers, all from the comfort of your dorm room, school library, or couch at home! You'll get the opportunity to learn about energy, economics, multilateral assistance, and regional energy policy from a post that is right in the thick of it all! You'll also get feedback on how to write effectively for U.S. government audiences, a better idea about how U.S. foreign policy is formed and shaped, and an enthusiastic supervisor who will talk your ear off about careers in international affairs with the U.S. government.

European Economies

International Trade

Analytical Writing

International Affairs

International Law

Environmental Law

Economic Analysis

environmental science

Additional Information

Intern should have an interest in learning about international relations, government policy, and/or energy issues but an academic background in these topics is not required. We are looking for someone with curiosity, great internet search skills, and the ability to think strategically and write persuasively. Study of Russia, the former Soviet Union, European Union, and post-cold war politics/economics are all great foundations for understanding the energy issues facing Ukraine today.

Language Requirements
