

Mobile Mental Health for Veterans

Project Title	Mobile Mental Health for Veterans
Project Summary	Contribute your marketing, research, or quality assurance skills to our mobile apps program at the National Center for PTSD.
Country	United States
Agency	Veterans Affairs Department
DoS Office	N/A
Post	N/A
Section	N/A
Number of Interns	3

Project Description

We are seeking highly-motivated students to help with one or more of the following tasks: quality assurance (mobile app testing), market research, graphic design, social media marketing, and/or supporting mobile mental health research.

We currently have a large portfolio of mobile apps for promoting behavioral and mental health among Veterans. We are looking for creative, analytical, and detail-oriented students to help build our marketing efforts and support our research and evaluation projects.

Desired Skills Interests

Skill

Graphic design

At the National Center for PTSD, Dissemination & Training Division, our mission is to bring mobile technology for mental health to Veterans and everyone who cares for Veterans. We create mobile products that help people connect with the education, tools, and resources they need, no matter the time or place. We design, build, disseminate, and evaluate these products in a constant cycle that incorporates the needs and perspectives of our stakeholders. Everything we make is based on research, fully accessible to people living with disabilities, and free of charge.
