

UX Apprenticeship

Project Title	UX Apprenticeship
Project Summary	Explore all facets of user experience research and design at the Department of the Interior's Office of Natural Resources Revenue. Work on our open data website that presents revenue brought in from natural resources extracted on federal lands and waters and other websites managed by our team.
Country	United States

Project Description

We are informing policy debates and raising public awareness by building the definitive source of timely and useful data about how the government manages federal energy and mineral resources, revenue, and disbursements. You will participate in all aspects of user experience including recruiting participants, conducting user research, creating designs, and learning about how these fit into the overall process of developing a live, open source government product. Learn from our experienced UX designer as well as our program analyst subject matter experts. The exact tasks will depend on the intern's expertise and interest areas and the needs of our team throughout the internship period.

Required Skills or Interests

Skill(s)
Design thinking
Graphic design
Research
Website design
