Use your video creation skills to make a difference!

Project Title	Use your video creation skills to make a difference!
Project Summary	Do you like creating videos? Would you like to put those Tik Tok skills to professional use? Do you have a knack for storytelling? USAID Philippines is looking for a storyteller to highlight our work.
Country	Philippines

Project Description

Help us tell the stories of our work in the Philippines, the Pacific Islands and Mongolia! You may be working on a health video story highlighting our work with frontliners. Or you may be highlighting our fisherfolk bringing their catch to market. Our stories are compelling, and we need your help telling them!
Interns will create two short, 3-minute videos per month for the USAID Philippines social media accounts. Working with USAID employees and organizations in the field, the intern will source the images or footage to use in the video.

Interns will need a working knowledge of at least one or more video editing and image editing software. We require interns who have a good understanding of social media, particularly vlogging, Facebook and Twitter, and who have experience generating content that is creative and engaging.

Required Skills or Interests

Skill(s)
Graphic design
Storytelling/blogging/vlogging
Videography
