

User Experience and Programmatic Data Analysis

Project Title	User Experience and Programmatic Data Analysis
Project Summary	Provides assistance in collecting, organizing, analyzing and developing recommendations related to the work of Peace Corps' Office of the Third Goal and Returned Volunteer Services.
Country	United States

Project Description

This project analyzes information available to the Office of Third Goal & Returned Volunteer Services to better understand the impact staff efforts to support Returned Peace Corps Volunteers (RPCVs). This project may include data collection (including user interviews), data analysis (including both qualitative and quantitative data), development of data visualizations and the possible production of associated reports and / or recommendations. The results of the analysis will be used to support a wide variety of projects in the office which include: current and planned communications to RPCVs, content and services provided via Peace Corps-managed websites and internal strategic planning and prioritization. Other duties as may be assigned as needed.
