Apply Creative Design & Data Visualization to help U.S. Embassy BiH Assistance Coordination.

Project Title	Apply Creative Design & Data Visualization to help U.S. Embassy BiH Assistance Coordination.
Project Summary	Shape how U.S. Embassy Sarajevo collects, analyze, and visualizes data tied to U.S. assistance to BiH.
Country	Bosnia-Herzegovina

Project Description

Looking for an innovative, data visualization expert to lead development of a user friendly interface that collates assistance data from across the embassy's interagency to provide user driven graphics and reports. Use data from past and ongoing assistance projects to create clear, compelling, and aesthetically pleasing maps (ideally interactive) and other graphics that show where we have invested both geographically and thematically. The goal is to more effectively understand and tell the story of our foreign assistance in Bosnia and Herzegovina in order to better support our diplomacy efforts. This project will have high visibility with our front office.

Required Skills or Interests

Skill(s)
Coding
Data analysis
Infographic design
