Botswana: Assess the structural/institutional landscape for Persons with Disabilities (PWD)

Project Title	Botswana: Assess the structural/institutional landscape for Persons with Disabilities (PWD)
Project Summary	This project will analyze and identify potential impacts that the COVID-19 pandemic has and could continue to have on the President's Emergency Plan for AIDS Relief in Botswana.
Country	Botswana

Project Description

- We have an office that coordinates disability issues in Botswana, a number of umbrella disability CSOs, and institutions offering stimulation and education for children with disability. Some of the CSOs are funded by GOB. Virtual intern to assess the structural/institutional landscape for PWDs in Botswana.
- Disability and HIV/COVID and other health challenges - look at access to information (language, mode of communication availability of information for PWDs), access to health facilities (accessibility for PWDs, their right to privacy), how COVID may/may not impact PWDs.
- Draft a proposal for USAID central funds that addresses identified priority gaps and challenges.
