Lost in Translation

Project Title	Lost in Translation
Project Summary	Creatives wanted to work on GIS communication products that tell our story. Improve the Forest Service messaging on technical initiatives that highlight what we do for the public.
Country	United States

Project Description

You'll work with passionate group of GIS specialists from across the US to highlight GIS work being done in the Forest Service. Working from our GIS Communication Plan you'll create brochures, post on our social platforms, add to our internal and external websites, fine tune FAQs and much more. Students should be comfortable with conveying technical jargon into easy to understand terms or graphics. You'll be expected to perform independent research and apply your critic thinking.
