Data Visualization Support for USAID's Agency-wide Learning Agenda

Project Title	Data Visualization Support for USAID's Agency-wide Learning Agenda
Project Summary	Are you interested in working on USAID’s first Agency-wide learning agenda to support our mission of fostering country Self-Reliance? Are you a champion for using evidence to influence programming and policy? If you answered yes to the above questions, you may be the person we’re looking for.
Country	United States

Project Description

The Bureau for Policy, Planning and Learning (PPL) and the Global Development Lab (Lab) are leading USAID’s Self-Reliance Learning Agenda (SRLA). This learning agenda is designed to answer the most important questions USAID has about how countries progress in their journey to self-reliance, and how USAID can be an effective partner on that journey.

The Data Visualization Intern will analyze and visualize data to support ongoing research and learning activities. Additionally, the intern will play a vital role in helping the Self-Reliance Learning Agenda share key insights with internal and external stakeholders to facilitate use of evidence in decision-making.
