

Open Source Research – Arms Control, Verification and Compliance

Project Title	Open Source Research – Arms Control, Verification and Compliance
Project Summary	(AVC) is seeking virtual interns to explore publicly available data that supports our efforts to understand and map the nuclear activities of key countries, including China, Russia, North Korea, Iran, Syria, and Pakistan. Understand and address related weapons of mass destruction (WMD) threats.
Country	United States

Project Description

This effort will support The Arms Control, Verification, and Compliance Bureau (AVC) requirement to enhance our ability to monitor the Weapons Mass Destruction(WMD)-related activities of countries and entities and verify the compliance of countries with their arms control, nonproliferation, and disarmament agreements and commitments. Specifically, interns would provide open source research support to verification and compliance investigations into China, Russia, North Korea, Iran, Syrian, and Pakistan, and other treaty verification and compliance priorities. Our goal is to use open source data tools to monitor and detect potential violations as well as build evidentiary packages against suspect infringements. In effect, we seek to crowd source unclassified aspects of our mission set enlisting investigatively-minded researchers. Candidates should have familiarity and demonstrated acumen in open source research techniques and tradecraft, an ability to think deductively with available data about opaque challenges, and digest, process, and report on information. Foreign language abilities would be beneficial as well. We seek those who can connect the dots across an increasingly open internet and online researchable world.

Required Skills or Interests

Skill(s)
Analytical writing
Data analysis
Editing and proofreading
Research

Additional Information

None

Language Requirements

Language	Speaking Proficiency	Reading Proficiency	Importance
Korean	No practical proficiency	No practical proficiency	Nice to Have
Russian	No practical proficiency	No practical proficiency	Nice to Have
Arabic	No practical proficiency	No practical proficiency	Nice to Have
Chinese-Mandarin	No practical proficiency	No practical proficiency	Nice to Have
Persian-Farsi	No practical proficiency	No practical proficiency	Nice to Have
